STAFF INFORMATION SOURCE: Code Inspector

BACKGROUND: This property is vacant, unsecured, and has been a public nuisance for several years with both cleaning/mowing and property maintenance issues. The Building Development Department has a safety concern for the children in the area. The structure is beyond repair and it is the opinion of the Building Development Department that it should be removed.

City Manager Reports

- Our city street department remains busy repairing several major drainage pipe issues. They recently completed replacing a large drainage pipe at the corner of Choctaw and Cherokee, and are currently working on Lucy Street repairing an area where water has washed underneath another drainage pipe.

- Staff continues to work on a water/stream issue affecting the Phase II expansion of the landfill. On December 5, staff, our consultants and a representative of the Corps of Engineers had a very productive meeting on how to refile our application and review several ideas on mitigation of the issue.
- We have a drainage area that runs on the south side of the Cherokee underpass pumphouse. This drainage area extends all the way south to Port Arthur. Parts of the drainage ditch along the pump house is collapsing and must be rebuilt. The street and electric departments are working on planning this repair, and also coordinating with the railroad to clean out the drainage area running along the west side of the railroad to Port Arthur.
- Street Overlay Program: We continue to monitor the cost of a street overlay program. We will make a determination sometime after the first of the year. Another issue that

has crept up on us is the need for more street repairs similar to what is described above. The street department must be free for a few months to prepare roads for overlay.
